

VFX Stylized Text Popup Effect Pack

This pack contains a dynamic collection of visually stunning and customizable text effects designed to elevate your projects into height. Perfect for games, videos or any creative endeavor. The pack is designed for easy integration, allowing creators of all levels to enhance their projects with visual effects.

Usage

- Import the package in your unity project
- Drag and drop “PopUpEffect” prefabs one by one into your scene.
- Or enable any effect from demo where all effects are already placed and play the scene to the popup effect in an action.
- You can customize various parametes to achieve the desired visual effect including color, size, shape, textures, ,meshes etc.
- Access the inspector and adjust the settings as necessary until you achieve the desired look.

This pack contains the following folders:

1. Prefabs:

24 prefabs of Stylized Text Popup Effects..

2. Demo Scene:

In Demo scene you will see all the visual effects of PopUpEffects.

3. Textures:

It contains subfolders:

Sprites: This folder contains 19 stylized popup text sprites.

VFX Textures: This folder contains 12 unique textures.

4. Materials:

It consists of 2 subfolders:

One contains all text popup materials.

And the other contains 12 materials for vfx textures.

5. Documentation:

Read Me File.

Note:

If you want to add your own text sprites into any VFX effect then set their 3D size parameters according to your png dimensions.
